## **We're launching huunuu Legal!**

***We're excited to announce the launch of huunuu Legal - your portal for everything from Will Writing to keeping all of your digital assets in one place.***

Almost 60% of the UK don't have a will. Many of us see it as complicated process and have no idea where to start. Some of us think we don't need a Will, that we can make one at 'another time' - but this isn't the case!

Now it's possible to create, edit and manage your Will or LPA online with huunuu Legal!

We're offering a range of useful, easy to use services to help you plan for your legacy, including:

### **Will Writing**

Make sure your finances, property, possessions and everything else go to the people who matter. Your Will is written by solicitors with years of experience and you'll have unlimited access to it. The Will Writing service from huunuu Legal allows you to create a Will online, receive unlimited specialist advice, you can print and sign you Will from home whenever you're ready!

### **Legal Power of Attorney (LPA)**

Legal Power of Attorney is where you choose your trusted person or people to take care of your property and financial affairs in case you're too mentally or physically unwell. Our jargon-free Legal Power of Attorney process is easy to use, with access to your very own legal specialist.

### **Executor Toolkit**

If you've been named as the executor of a Will, you may be left scratching your head at where to start. The Executor Toolkit guides you through the entire process of dealing with, and distributing, assets, finances, property and possessions. It's designed to make the experience a lot more manageable and provides information as and when you need it, as opposed to the usual bombardment of legal jargon and mountains of paperwork.

### **Online Accounts**

Make sure your loved ones can easily find important details about your 'online life.' These are stored in a document called a Memorandum of Wishes. It includes details related to online banking, cryptocurrency wallet information, social media accounts, government accounts, investment portfolios and more.

Users can also use the Filing Cabinet in the 'My Life Admin' section. This is where you can record your important information, find where it is and let your trusted people know how to access it.
